Put a ring on it! Slim Panstick offers colour-coded elegance

Quadpack's Make-Up Division has extended its range of Q-Line Pansticks with a slimline version. The Slim Panstick is designed with a removable ring that can be colour-matched to the bulk, for easy identification in store displays.

The 10ml Slim Panstick is ideal for water-based formulations. It is suitable not only for make-up applications like foundation, blush and highlighter, but also for special treatment skin care, sun care and solid perfumes. Its long, slim stick enables easy and precise application of the formula onto the skin.

Besides the colour ring, the rest of the pack offers the perfect backdrop for creative design, applied through silk screening, hot stamping, spray coating, metallic spray coating or metallising.

The cup size is compatible with standard top- and bottom-filling machines (including moulding and hot pouring) for easy filling.

The Slim Panstick with removable ring will be launched this Autumn.

The Q-Line Panstick range also includes 4.5ml and 15ml formats – check out the full range in our online catalogue.

--- ENDS ---
