Emerald Lipstick – smooth, elegant and versatile

Quadpack's™ new monomaterial lipstick offers high-performance in a clean, minimalist design

The new Emerald Lipstick from Quadpack is an expression of minimalist elegance. Stripped down to its essential features, it encapsulates high performance in an elegant design that's™ completely monomaterial. The lipstick is available in a square or cylindrical shape, with a choice of materials. These include recyclable PET and up to 100% recycled PET (rPET) for brands looking for a more positive impact from their packaging. Moreover, the mechanism is POM-free for improved circularity.

The mechanism works smoothly and the 12.7mm cup is perfectly sized for most lipsticks on the market, with a capacity of 4-4.5g. The design has harmonious proportions for ease of use. The top-filling stick is incredibly versatile and can contain a range of makeup and skincare products, such as lip colour, balm and solid fragrance.

Emerald's™ understated aesthetics can be enhanced with a host of discrete finishes – including silk screening, hot stamping, matt spray and pearl varnish – to achieve a look of refined simplicity.
