## **Yonwoo airtight compact for Ultracuticals®™ CC Mineral foundation**

From BB to CC – ‘Colour Correction’ is the new buzzword in advanced skin care. The Australian company Ultracuticals has taken the lead in high-tech CC cosmetics with a face powder-foundation presented in an airtight Yonwoo compact developed by Quadpack.

The Ultracuticals Complete Correction Powder Pure Mineral Foundation promises to brighten and even the skin complexion with a powerful, advanced formula of anti-ageing vitamins and minerals, while providing an even and flawless coverage. Such a groundbreaking product required an equally groundbreaking packaging concept – not only to help boost the performance of the product, but also in keeping with Ultracuticals’ market position as a state-of-the-art brand. Enter Quadpack, with a revolutionary new airtight compact from Yonwoo that is as stylish as it is high performing.

Yonwoo’s airless compact contains a small, unfolding tray that comfortably holds a sponge, pad or brush. When the compact’s lid is twisted to close, the tray is pressed firmly into the shell’s ridge, hermitically sealing the product inside, protecting it from exterior elements and extending its shelf life. The Ultracuticals compact is finished with a pearl-white spray on the cap and base, and a metallic silver rotator and stamp bearing the company’s distinctive graphic elements.

The Ultracuticals CC Powder Pure Mineral Foundation is sold in clinics salons and retails outlets throughout Australia New Zealand, Hong Kong, Russia, Greece and the US.

--- ENDS ---
