A respectful pact with the future

Through its RePack strategy of sustainable product development, Quadpack makes a commitment to recycling, replacing, reducing and reusing packaging materials

As a packaging provider, Quadpack carries a big responsibility: to manufacture products that are respectful to the environment. Sustainable innovation is key to achieving this goal and the main driver of its product development approach, which includes creative design, research into new materials

and increasing awareness about the lifecycle of every packaging solution. Based on the 4Rs of resource management, meet Quadpack’s RePack strategy:

Recycle – Quadpack is committed to the development of products that are easily disassembled and recycled. Glass, PP, PET and PCR components, as well as mono-material packs, in which all parts are made from the same material, are being increasingly adopted.

Reduce – Either by launching lighter versions of traditional packaging or developing new products that require less material, Quadpack is consistently investing in high-quality packaging with reduced material usage. Lighter glass bottles and weight-reduced plastic jars are examples of successfully reduced products.

Replace – Through research and development, Quadpack is opting for more renewable, biodegradable and recycled materials, replacing fossil-based components. Wood sourced from sustainably-managed forests, ocean waste plastic and bio-based, microplastics-free material (Sulapac) are some of the rising stars of this replacement strategy.

.../continued

Reuse – As part of its commitment to extending the lifecycle of packaging, Quadpack is investing in refillable solutions that enhance sustainability, reduce waste and minimise carbon footprint. Wood and glass components that can be easily reused and repurposed are important elements of its design and product development.

Quadpack is aiming to ensure that each and every one of its packaging solutions embodies at least one of the 4Rs, while encompassing all of them is the ultimate goal. By offering a range of products clearly built around the 4Rs, Quadpack keeps helping brands with a practical route towards sustainable packaging. The RePack strategy is setting the foundations for what Quadpack wants to achieve: a more sustainable manufacturing chain which cares about people and the planet and which helps to increase its positive impact on society and the environment.

This document contains forward-looking statements about Quadpack's business, financial data, and events related to the company's prospects. These forecasts can be identified by the use of words such as 'estimated', 'plan', 'expectation' or words with a similar meaning. Quadpack may also make projections in other reports, presentations and press releases. Furthermore, the company's representatives may occasionally make forward-looking statements. These projections are based on current expectations and on certain hypotheses, many of which are beyond the company's control and subject to a series of risks and uncertainties. In the event that any of these risks or uncertainties should materialise or the underlying expectations are not fulfilled, the results or performance of Quadpack may differ (either positively or negatively) from those explicitly or implicitly forecast. Quadpack assumes no obligation to update or revise any forward-looking statements made previously.
