## Quadpack invests in smart manufacturing

*Efficiency, high technology and sustainability are at the core of its operational strategy*

Strategic investments amounting to €4 million in Quadpack's manufacturing capability focus on increasing capacity, speed to market and sustainability. The planned investments will help the company in its objective of providing beauty packaging solutions in the region, for the region. Quadpack's factories in Germany and Spain will focus on airless and sustainable packaging innovation within its QLine portfolio of smart, modular solutions, which can be stocked, assembled and decorated anywhere in the world.

Quadpack Wood in Spain now boasts a biomass plant that is leading the factory to carbon neutrality – an investment amounting to €2.5 million. Using wood scrap to provide air conditioning and heating, the new plant brings clean energy, cuts waste and reduces dust in the air, for greater health & safety. Thanks to this investment, the factory has already achieved a reduction of approximately 400 tons of CO2 emissions a year.

In addition, €360,000 is being invested throughout 2021 on Industry 4.0, the start of a multi-year project that will include more factories and system implementation. The factory currently has 63 machines connected by Internet of Things (IoT) devices that will provide real-time data, giving process visibility and efficiency control of equipment. With a production capacity of 45 million pieces a year, the collective initiatives are setting a benchmark in smart and sustainable manufacturing.

A €2 million investment is earmarked this year for high-speed production and decoration at Louvrette, Quadpack's German-based manufacturing plant. Louvrette is the hub of Quadpack's airless manufacturing and is set to become a decoration nerve centre. New decoration and injection-moulding equipment will allow the factory to deliver finished products with a shorter lead time. In March, Louvrette inaugurated an airless assembly line with a capacity of 11 million units a year. The factory is also investing in new airless moulds, aiming to increase its airless capacity to 20 million packs a year.

#### Editor’s notes

Quadpack’s Manufacturing Division in Spain includes Quadpack Wood, the Quadpack Plastics injection-moulding facility and the Quadpack Impressions decoration plant. The Louvrette factory in Germany is dedicated to injection-moulding, decoration and assembly, with a focus on airless packaging development and production.

#### About Quadpack

Quadpack is an international manufacturer and provider of enhanced packaging solutions for beauty brand owners and contract fillers. With offices and production facilities in Europe, the US and the Asia Pacific region, and a strategic network of manufacturing partners, Quadpack develops bespoke and customised packs for prestige, masstige and mass market customers. Listed on Euronext Growth in Paris since October 2019, Quadpack relies on a workforce of 600 people to build a more sustainable world. This document contains forward-looking statements about Quadpack’s business, financial data, and events related to the company’s prospects. These forecasts can be identified by the use of words such as ‘estimated’, ‘plan’, ‘expectation’ or words with a similar meaning. Quadpack may also make projections in other reports, presentations and press releases. Furthermore, the company’s representatives may occasionally make forward-looking statements. These projections are based on current expectations and on certain hypotheses, many of which are beyond the company’s control and subject to a series of risks and uncertainties. In the event that any of these risks or uncertainties should materialise or the underlying expectations are not fulfilled, the results or performance of Quadpack may differ (either positively or negatively) from those explicitly or implicitly forecast. Quadpack assumes no obligation to update or revise any forward-looking statements made previously.
