## Refillable, recyclable and practical: meet New Regula Refill Jar!

*The new addition to the Regula family is an evolution in sustainability and convenience*

International beauty packaging manufacturer and provider Quadpack's Regula family, the best-seller range of jars and airless products, has taken another step in its positive-impact journey. Answering market demands for more user-friendly, premium and sustainable packaging, Quadpack is launching a jar that has it all: New Regula Refill Jar is recyclable, refillable, monomaterial and easy to use.

The 50ml pack has a thick-walled outer jar in PET, with a premium, glass-like aesthetic, perfect for prestige cosmetics brands. The inner jar, developed for optimal compatibility with most skincare formulas, is made of PP and is designed to be easily thermosealed, one of the best solutions for refills.

Both components can be quickly separated by hand, thanks to a gap in the outer jar specifically developed for easy removal. The refill is just as easily inserted, making a reassuring 'click' sound when closed.

New Regula Refill Jar's double-walled cap is completely made of PP, which makes all its components recyclable. Made at Quadpack's manufacturing site in Kierspe, Germany, the jar is an optimal solution both for brands that want to start their journey towards refillable packaging and for Regula Jar clients that want to take that extra step towards sustainability.

All components can be decorated using various techniques, as Quadpack offers complete manufacturing and decoration solutions made in Germany.

This document contains forward-looking statements about Quadpack's business, financial data, and events related to the company's prospects. These forecasts can be identified by the use of words such as 'estimated', 'plan', 'expectation' or words with a similar meaning. Quadpack may also make projections in other reports, presentations and press releases. Furthermore, the company's representatives may occasionally make forward-looking statements. These projections are based on current expectations and on certain hypotheses, many of which are beyond the company's control and subject to a series of risks and uncertainties. In the event that any of these risks or uncertainties should materialise or the underlying expectations are not fulfilled, the results or performance of Quadpack may differ (either positively or negatively) from those explicitly or implicitly forecast. Quadpack assumes no obligation to update or revise any forward-looking statements made previously.
