

# Company Background

## Quadpack Group corporate profile

Quadpack is a global manufacturer and provider of enhanced packaging solutions for beauty brand owners and contract fillers. Established in 2003, it has offices in the UK, US, France, Spain, Germany, Italy, Australia and the Far East, and a strategic network of manufacturing partners. Its headquarters and central test laboratory are located in Barcelona, Spain.

Quadpack develops and manufactures personalised standard packaging as well as customised/bespoke packs, for prestige, masstige and mass market customers, with specialist divisions dedicated to the skin care, make-up and fragrance sectors. Its proprietary product range, Q-Line, offers packaging solutions that meet and anticipate market needs, while its Q-Selection brings clients the best in packaging design and technology from its approved manufacturing partners around the world.

The Quadpack Manufacturing Division in Spain comprises the FSC- and PEFC-certified wood factory of Technotraf Wood Packaging (acquired in 2013); the Quadpack Impressions decoration facility (acquired in 2014); and the Quadpack Plastics injection moulding plant (acquired in 2016); along with extensive warehousing and the Inspiration Room, where its designers dream up the next great innovation.

Yonwoo Europe, Quadpack Group's joint venture with Yonwoo Korea, exclusively supplies its leading airless packaging portfolio in Europe to global cosmetics brands.

The Quadpack Foundation, formed in 2016, exists to help the social integration of disadvantaged young people, promoting awareness and a spirit of solidarity, and working together with other entities to develop programmes to support children in need. It also provides a structured framework for the Group's charitable activities, which revolve around helping to improve the economy and environment of the areas in which it operates.

Quadpack Group's turnover is €61m (year end 2015), with over 180 staff employed worldwide.

## Quality from source to client

Quadpack's sourcing experts are experienced in project managing complex designs with manufacturers in Europe and the Far East, bridging any cultural differences and with a deep understanding of brand requirements.

Quadpack is able to develop packaging solutions that meet the design, technical and budgetary needs of its customers, all with a guarantee of quality underpinned by its extensive testing facilities and an ISO9001:2008 quality system.

## Innovations in dispensing technologies

Quadpack excels in introducing the latest packaging innovations to western markets. Through strategic partnerships with cutting-edge manufacturers, it brings new developments to its customer base, keeping them at the forefront of emerging trends.

As exclusive European supplier for Yonwoo, Quadpack is the first choice in airless products. Airless technology protects advanced formulas from external contamination, while enabling the use of less artificial preservatives. This makes these increasingly popular packs ideal for cosmeceuticals and organic formulas.

Quadpack is also the exclusive distributor of Apollo dispensers in Europe, Australia and New Zealand, including its patented, cutting-edge foamers for baby care lotions, facial cleansers and hair treatments, which avoid metal parts in the product path. For perfumery, Quadpack partners with Premi from Italy. For colour cosmetics, Quadpack partners with Brivaplast, to provide its integrated mascara systems, as well as lipstick and lip gloss.

What's more, Quadpack's production facilities at Technotraf Wood Packaging enables it to offer beautiful bespoke packaging concepts from sustainably-sourced wood.

With Yonwoo airless systems, Apollo pump technology, Technotraf wooden components, Premi perfumery and Brivaplast mascaras, Quadpack is in an unprecedented position to offer its customers a full range of complementary packaging solutions.

## Quadpack standard beauty packaging solutions

While Quadpack is best known for developing customised packaging, it also has an extensive catalogue of standard packaging products that can be competitively adapted for any type of client. Ideal for house brands, cosmeceutical/OTC lines of high-street chemists and cosmetics companies' new launches, the Quadpack standard portfolio includes everything from jars to tubes, which can combine to make a complete branded range:

- Pumps & dispensers
- Plastic jars
- Glass jars
- Bottles / tottles
- Roll-ons
- Plastic tubes
- Protective foil-lined tubes for delicate formulas
- Double-sided tubes
- Recyclable packs (PP, PE)
- Sample packs & refill packs
- Pan sticks
- Mascaras
- Colour cosmetics
